What is DAPP ?

A decentralized application is a computer application that runs on a distributed computing system. Dapps have been mostly popularized by ledger technologies, namely the Binance blockchain, where Dapps are often referred to as smart contracts coding. Once a smart contract is deployed on the Binance blockchain, after that no one can make any change in it and no one can cancel the contract. All the deposited BNB Tokens will go into the smart contract & provide tokens and dividends too. Deposited BNB Tokens are 100% safe in smart contracts.

What is Binance BNB Blockchain?

Binance is a plasma-based aggregator which is a layer 2 Solution for Ethereum , that Provides a framework for building dapps.

Binance (BNB) Token is not only used for investment purpose but also for the security of Binance network It's available for decentralized as well as centralized trading.

BNB token has increased it's value in market after it's rebranding. its has a cover of 10 billion which is currently valued over 7 Billion.

Binance blockchain is used in various field such as Defi (Decentralized Finances), DApp (Decentralized) Application) DAO (Decentralized Autonomous Organization) etc.

GROWTH RETURN OF STAKING

When we invest on a trusted crypto coin and choose to stock it, then we can profit because the growth of any coin tends to increase over time. When we look at the value of a coin after a long period of time keeping passion, its value keeps on increasing.

BITCOIN BEFOR AND AFTER VALUE

In 2009, Bitcoin per coin Value = \$ 0.0075

2021, Bitcoin per coin Value = \$ 65000
